KLEHMS' NURSERIES, Inc.

ESTABLISHED 1856

ARLINGTON HEIGHTS, ILLINOIS

To facilitate ready reference, we print here the prices of the stock grown in our nurseries. In considering our prices, remember that we quote only on stock of first quality.

It is our endeavor to grow all our products just as well as they can be grown. From spring until fall, the nurseries are cultivated every week, and the plants are kept growing constantly. This, with rich soil, and frequent pruning and transplanting, makes them larger, thriftier, and more vigorous than those given only ordinary care. Severe winter prove the hardness of the stock.

We pack our products exceedingly well. It is our practice to "puddle" the roots of shrubs and other stock (dip them in thick mud) so all air will be excluded from the roots. Protected this way, and additionally safeguarded by the good wrapping or boxing that we give them, our trees and shrubs reach their destination in perfect growing condition. With stock true to name, grown right, dug carefully, and packed securely we can please every planter.

We shall be glad to welcome prospective planters at our nurseries, where we can show them many interesting specimens of rare and desirable plants, and to assist them in selecting personally the stock that they desire.

Cherries

	Each	Per 10	Per 100
Sour, on Mahaleb, 5 to 7 ft.	\$1.25	\$10.00	\$90.00
Sweet, 5 to 7 ft.	1.25	10.00	90.00
Early Richmond & Montmorency on Morello 3 to 4 ft.	1.25	10.00	90.00
Early Richmond —Sour, an early red cherry, Fruit medium sized, juicy and acid. Fine for cooking and canning.			
English Morello —Sour, medium to large, nearly black, tender and juicy. Fruit ripens in early August.			
Montmorency —Sour, a fine large, bright red cherry of the Richmond class. Ripens ten days later. Fruit valuable for canning and preserving.			
Black Tartarian —Sweet, very large, black, juicy, rich.			
May Duke —Sweet, fruit large, dark red, rich and juicy. Ripens gradually.			

We have the Early Richmond and Montmorency grafted on the Morello stock which makes them harder and more prolific in this locality than those grafted on the Mahaleb. We are the only Nurserymen that we know of that propagate them on this stock. All others are grafted or budded on Mahaleb or Mazzard.
